

Response

Applicants appreciate the Examiner's efforts to point out formalities in claims 1-24 that required revision prior to issuance of the patent. Claims 1, 3, 7, 13, 14 and 16 have been amended as requested, mooted the Examiner's objections. Claims 3, 9 and 16 needed no further amendment in light of the present amendment to claims 1, 7 and 14, respectively. In addition a typographical error in each of claims 5, 11 and 18 has been amended. No new matter has been added and all amendments are fully supported by the previously pending claims and by the specification.

Applicants respectfully seek withdrawal of the objections raised in the In re Quayle Action and process this application for issuance.

Applicants' undersigned attorney may be reached by telephone at (215) 988-3361. All correspondence should be directed to the below-listed address.

Respectfully submitted,

Date: December 2, 2005
